Very cold weather ahead — are you prepared ?

There is a cold snap coming the next few days and nights and we expect very cold weather at Lagoon Point. It is important you protect your home and its water lines. Check that water is indeed shut off to your docks, irrigation systems and all outdoor pipes and faucets. Drain your outdoor water pipes or otherwise protect them. To protect pipes in the exterior walls of your home it is advisable to heat all rooms that have exterior walls with pipes in them. Last time we had a big freeze several hoses to docks froze and when frozen went unnoticed. Later, when they thawed they poured thousand of gallons of water into the canals (running up water charges). The freeze also caused broken pipes in some homes.

Thank you
Lagoon Point Water District
