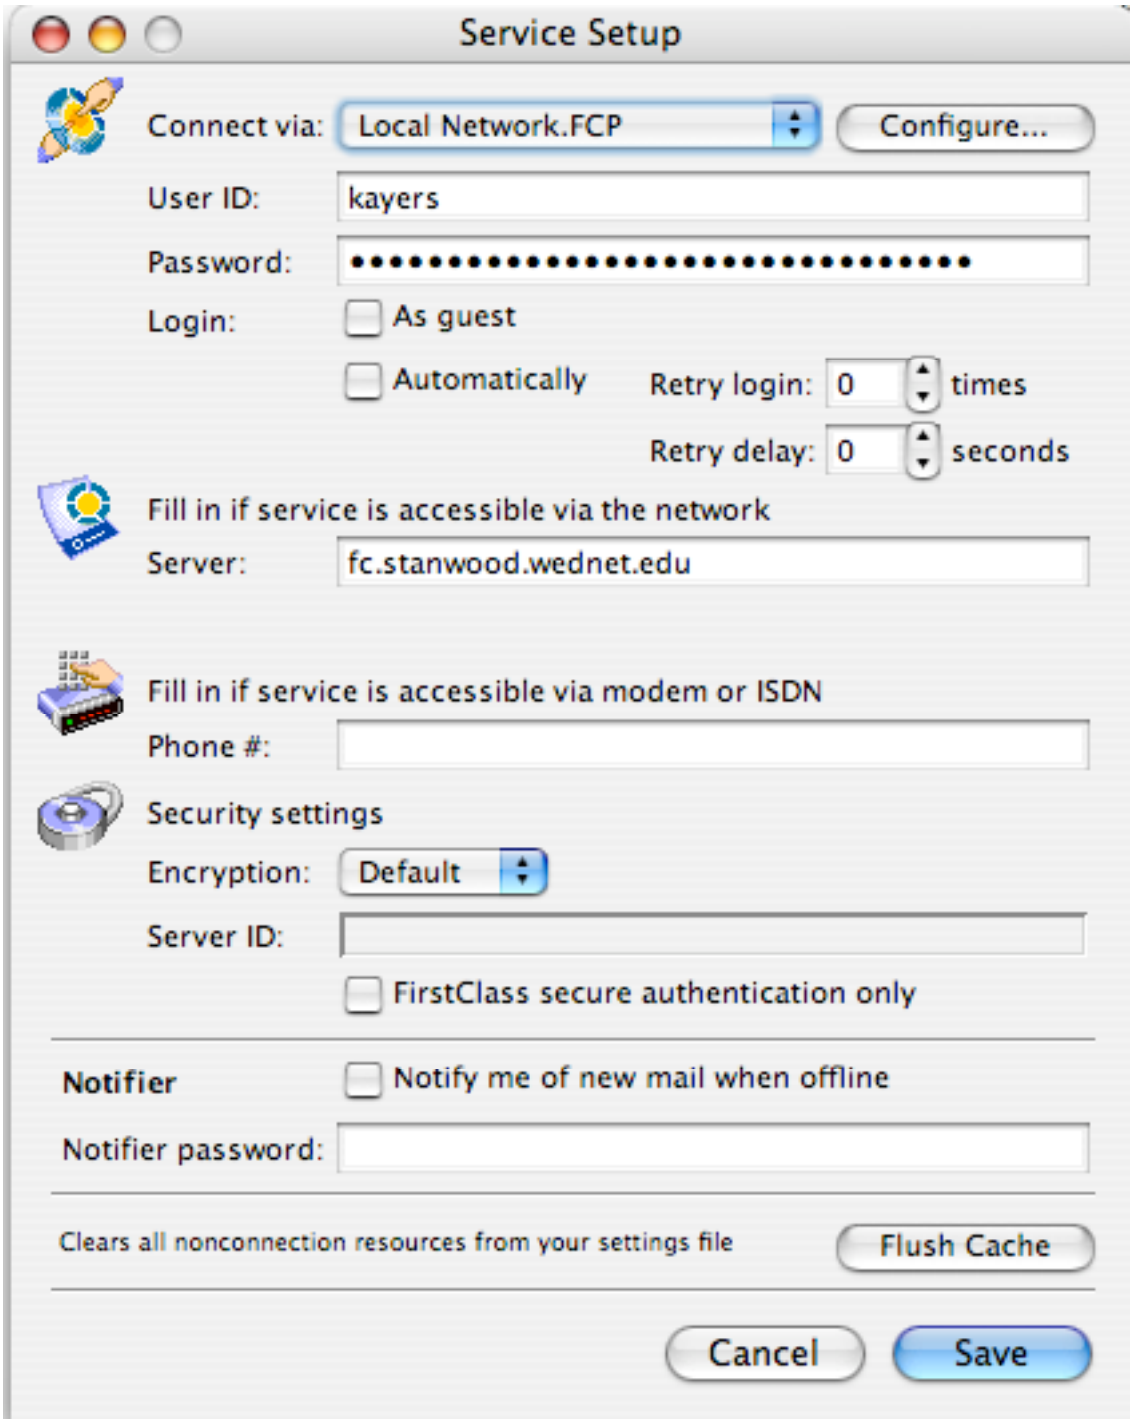
Here are the instructions for installing FirstClass on your home (or anywhere) machine. You can also get to the Stanwood School Districts web server with a web browser at http://fc.stanwood.wednet.edu


Go to http://www.firstclass.com/clientdownloads/ and download the installer for the client you want. Run the installer. After it is installed you will need to configure FirstClass for our server. From the "Collaborate" menu select "home.fc setup". The "Server:" field must have "fc.stanwood.wednet.edu". You may also have to change the Connect via: options for your connection. No other configuration is necessary but you may want to save your name or password.
